## It's census time Now through October 31

If you're like me, you've probably received a number of pieces of Census mail. All the mail has a unique number for my household. Last weekend, I logged on and completed the questionnaire. It's short, clear and easy to navigate.

The history of the Census comes from a mandate in our Constitution that a national survey would be administered every 10 years. This data is used to inform the number of seats each state has in the House of Representatives, and it also informs where billions of dollars are allocated through federal, state and local funding streams. So it's important.

The questionnaire is in 13 languages. You can easily take the survey on your desktop computer, tablet or Smartphone. Go to [census.gov](https://www.census.gov) to get started and read a little more information about how the data is used.

### Important information:

Data breach -- It was reported that 200 million personal records belonging to the Census Bureau were stolen...this is false. It was a credit card company that experienced this theft.
